

realme Magnetic Cooling Clip User Guide	In the Box Cooling Back Clip x1 Phone Clip x2 Magnetic attracting sheet x 1 USB-C Charging Cable x1 User Manual/Warranty Card x1 Product Concept Drawing Fan Back Clip RGB Light Air Outlets Input Port Switch Phone Clip Interface USB Type-C Notes: The mobile phone comes with a back magnet, so there is no need for amagnet sheet. For mobile phones without back magnetism, the magnetic trigger sheet needs to be installed on the back of the mobile phone. Or attach the clip to the radiator to use this product.	Installation Instructions Magnetic Attracting Sheet Tear off the release liner and attach the magnet sheet. The clamp convex groove puts the clamp into the groove according to the direction of arrow 1 and then presses the clip down according to arrow 2. 1 2 Clamp Convex Groove Magnet and clip mounting (as shown in the figure above) 1. Connect a power source Insert the Type-C port charging cable into the input port (bottom) of the cooling clip, connect the power adapter or power bank to the other end, the cooling clip light will be always on, the fan will start to rotate, and the cooling clip will start working.	2. Instructions for the use of the buttons On/off buttons: Short press the power button to switch gears, default to large gear, short press the power button once to switch to small gear, and short press the power button again to stop using. Usage Instructions 1. Use the mobile phone charger and USB-C charging cable that meet the recommended specifications. 2. If the output of the external power supply is lower than the product's minimum input power, the product may not work properly or the cooling system may be affected. 3. When the product is cooling during operation, it is normal for some water vapor to condense due to loose fitting or lack of load. 4. When the product is not in use, disconnect the power supply to avoid device damage resulting from excessive water vapor condensation on the contact surface caused by lack of load. 5. Do not block the air inlet or the fan with foreign objects when the product is in use, as this may reduce the effectiveness of the cooling process. 6. Do not use the product if the fan is damaged and has stopped working. 7. The actual cooling effect of the product may vary depending on the material of the device being cooled, the contact effect, and the temperature and humidity of the environment. 8. When using the product to cool down a mobile phone, it is recommend-ed to remove the phone's protective cover and place it atthe back of the phone to achieve maximum cooling.
